Vivek Kumar Patel

Software Engineer, Backend | Java, Spring Boot, Microservices, Kafka

Bengaluru - 560068, India | +91-7701852442 | vivekkrpatel2442@gmail.com | LinkedIn | GitHub | LeetCode | GeeksforGeeks

PROFESSIONAL SUMMARY

Java Backend Engineer with 3+ years in Spring Boot microservices, REST APIs, Apache Kafka, and reactive services. Deliver features from design through testing and deployment in Agile sprints. Shipped Optum prior authorization (50,000+ patients) and an AI-powered enterprise data assistant using PostgreSQL, Docker, Kubernetes, Jenkins, and Camunda BPM.

TECHNICAL SKILLS

Languages: Java 21, Python, SQL, JavaScript / React (working knowledge)
Backend & APIs: Spring Boot, Spring MVC, Spring WebFlux, Spring Security, Spring Data JPA, Hibernate, REST APIs, Camunda BPM
Messaging: Apache Kafka
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD, Red Hat OpenShift, Splunk, SonarQube
Core Concepts: Reactive Programming, Microservices, Distributed Systems, Multithreading, Collections, Data Structures and Algorithms, Design Patterns, Agile / Scrum
Testing & Tools: JUnit 5, Mockito, Git, Maven
AI coding tools: GitHub Copilot, Claude, Cursor

PROFESSIONAL EXPERIENCE

InspironLabs Software Systems Pvt. Ltd. - Bengaluru, Karnataka **Sep 2023 - Present**
Software Engineer, Backend

Optum - Prior Authorization Platform

- Architected 5+ scalable Java and Spring Boot microservices for a US healthcare platform serving 50,000+ patients.
- Engineered Apache Kafka event-driven pipelines processing 100K+ daily asynchronous events, replacing synchronous workflows and clearing bottlenecks across 3 downstream services.
- Integrated Camunda BPM to automate prior-authorization approval workflows, cutting manual processing time by 35%.
- Led migration of 2 APIs from NestJS to Spring Boot for a US government healthcare platform, working with client engineers, improving maintainability by 40% and decreasing inter-service dependencies.

Turinton - AI-Powered Enterprise Data Assistant

- Developed a reusable Java persistence-service library with two fetch and write REST APIs for executing parameterized PostgreSQL queries against configured client datasources.
- Centralized reactive database-access logic with Spring WebFlux, replacing 12+ direct ConnectionFactory calls across 6 Spring Boot repositories and decreasing configuration duplication.
- Cached query results in Redis for 6 downstream repositories, reducing average query response time from ~600ms to ~200ms.
- Implemented 2 mailbox connectors, Gmail, and Microsoft Outlook, to retrieve folders and messages for the email datasource.
- Wrote unit tests for 15+ persistence and connector classes using JUnit 5 and Mockito, validating reactive Spring WebFlux components.

Elevanta - AI Outbound Engagement Reporting (ReachOut to People)

- Designed a webhook-driven integration pipeline connecting Clay, Smartlead, n8n, and HubSpot: custom properties, an update-by-email contract, and real-time sync of cold-email engagement (sends, opens, replies, bounces) onto contact records.
- Created a Python backfill and repair tool reusing the same field-computation logic as the live workflow, used to recover historical contacts when webhook runs failed.
- Automated roughly 70% of the outbound engagement-sync process through n8n workflows, cutting manual HubSpot updates across sends, opens, replies, and bounces.

EDUCATION

B.Sc. Mathematics (Hons.), Lingaya's Vidyapeeth, Faridabad, Haryana Jul 2019 - Jun 2022
CGPA: 8.74 / 10

ACHIEVEMENTS

- Shining Star Award, InspironLabs 2024: recognized for delivery quality during the Optum ramp-up of 3+ backend services.
- Client Best Performance Award 2025: 1 client award for exceeding delivery SLAs and resolving critical production issues.

CERTIFICATIONS

AWS Partner: Accreditation (Technical), Amazon Web Services
